

- **Synthetic**
- **Non-dripping**
- **High-grade**
- **Complies with DIN EN 377**

Synthetic lubricating grease for gas valves and fittings, actuators, gas manifolds and transfer lines which are operated with gases according to the DVGW worksheet G 260.

Glissa-All Gas-Valve

Synthetic lubricating grease for gas valves and fittings and actuators

Authorised for natural and town gas as well as for all gases according to the DVGW worksheet G 260, authorised for propane and butane if there is no liquid phase.

Is used for greasing cock plugs or sealing elements such as membranes, packings or elastomer seals etc.

Suitable as a high-temperature and low-temperature lubricant.

Temperature range: -20 to +150 degrees °C

Fully synthetic lubricant complying with DIN EN 377.
