Fermitac hard PVC cleaner is a cleaner for tubes, sleeves and fittings made of hard PVC. For optimum gluing with Fermitac hard PVC adhesive, it is necessary to first clean the surfaces to be glued with Fermitac hard PVC cleaner.

Fermitac Hard PVC cleaner

Instructions for use:

Moisten clean, absorbent paper with FERMITAC hard PVC cleaner and clean the surfaces to be glued. Before you apply the glue, first allow the cleaned parts to dry.

Remove any condensation caused by fast cooling-down of the cleaner with absorbent paper immediately.

Do not use FERMITAC hard PVC cleaner for diluting adhesives!

Please note:

FERMITAC hard PVC cleaner is highly flammable. Keep away from ignition sources. Do not smoke. Do not inhale vapours. Do not allow it to get into the sewers.

Technical data:

Basis:

A mixture of organic solvents with acetone and methyl ethyl ketone (MEK).

Density:

0.8 g/ml

Viscosity:

1 mPa's

Storage stability:

24 months if FERMITAC hard PVC cleaner is stored below 30 °C in a firmly closed package.
